Index

- 1) Introduction to Problem Statement
- 2) Seven Segment Display
- 3) OCR Algorithm Standard and Modified
- 4) Lab Image Implementation
- 5) Introduction to full system
- 6) Camera Application and alternatives
- 7) Local python server
- 8) Backend implementation
- 9) Demo
- 10) Future Work

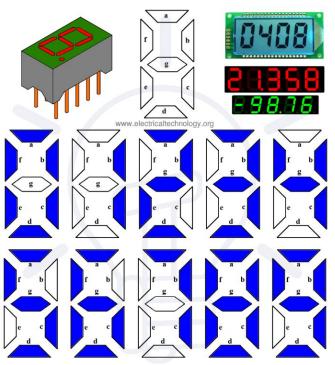

1. Introduction to Problem Statement

- Digital Reading
 - Easy for record keeping and traceback
 - Reducing redundant work
- Problems for applying central control system
 - Expensive
 - Cannot be applied to existing small scale industries time issues
- Solution
 - Using image-to-text recognition technology

2. Seven Segment Display

Started from Tesseract (Text based prediction)
 to Computer Vision (Image based) recognition

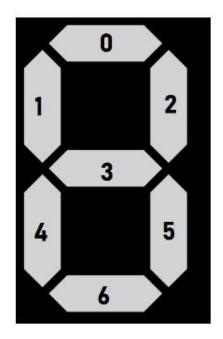

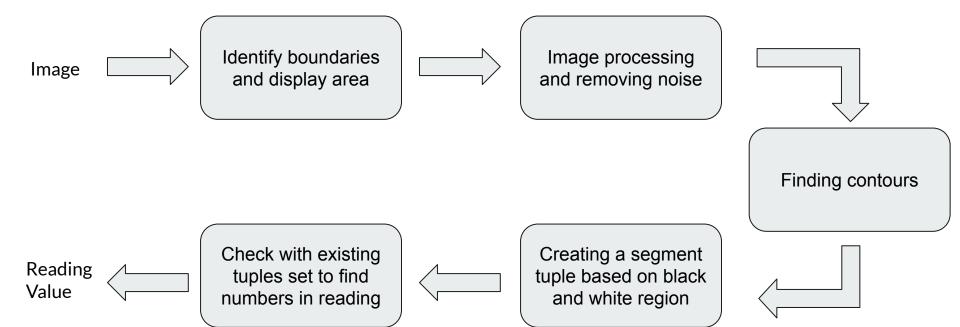

7-Segment Display - Its Typles, Working & Applications

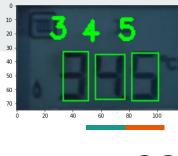

2. Seven Segment Display

Digits	Segments						
	0	1	2	3	4	5	6
0	1	1	1	0	1	1	1
1	0	0	0	0	0	1	0
2	1	0	1	1	1	0	1
3	1	0	1	1	0	1	1
4	0	1	1	1	0	1	0
5	1	1	0	1	0	1	1
6	1	1	0	1	1	1	1
7	1	0	1	0	0	1	0
8	1	1	1	1	1	1	1
9	1	1	1	1	0	1	1

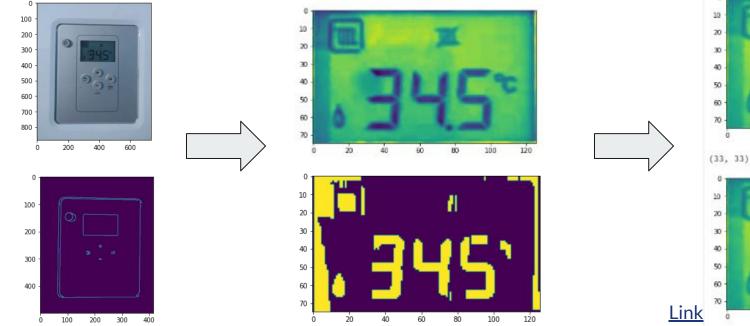

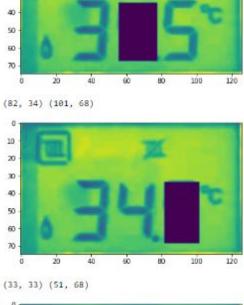

3. OCR Algorithm - How does it work?

3. OCR Algorithm - How does it work?

(56, 35) (77, 67)

20

30

3. OCR Algorithm - Image Processing Techniques

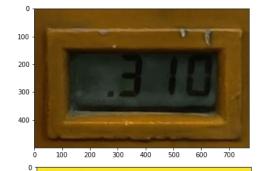

Library Used: openCV (an open source library maintained by Intel Corporation)

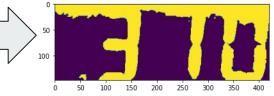

Image processing functions used from openCV library

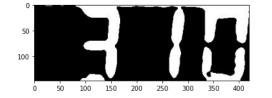

- cv2.THRESH_OTSU
- cv2.MORPH_ELLIPSE and cv2.MORPH_OPEN
- cv2.medianBlur()
- cv2.convertScaleAbs()

4. Lab Image

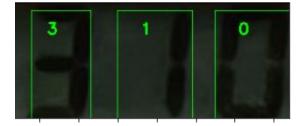

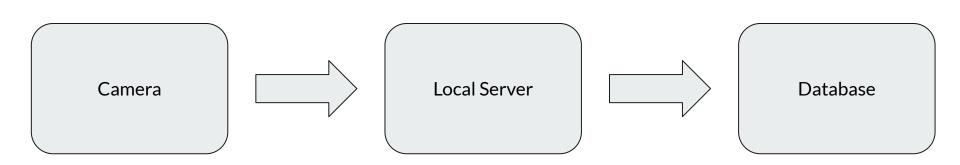

identified tuple [1, 0, 1, 1, 0, 1, 1] and identified digit= 3 identified tuple [0, 0, 1, 0, 0, 1, 0] and identified digit= 1 identified tuple [1, 1, 1, 0, 1, 1, 1] and identified digit= 0

5. Full system

6. Camera

- IP Camera
 - o Features -
 - ➤ Wireless Control
 - ➤ 360° rotation [manual/automatic]
 - > 1080P/Full HD
 - Working
- Pricing
 - Security Cameras
 - Very cheap and high quality
 - 1k-2.5k (amazon.com)

6. Camera

Demo 1

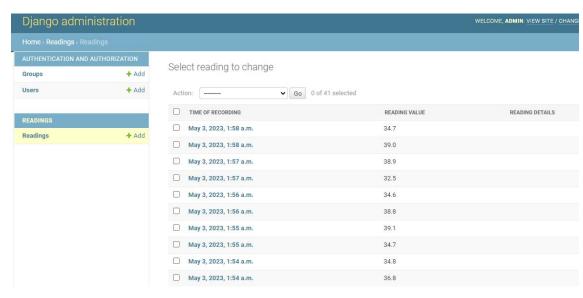

7. Local Server

- Python file running on server
 - Tuning parameter -How much time between two readings?
- Additional Option
 - Arduino or
 Raspberry Pi with
 Flask based API
 system

```
PS C:\Users\A\Desktop\OCR Tuts\seven-seg> python ..\loop_reading.py 2023-05-03 01:53:34.813387 36.0 {'data': 36.0, 'time_of_reading': '2023-05-03 01:53:34'} {'Status': 'Record Sucessfully Saved'} 2023-05-03 01:54:04.884561 36.8 {'data': 36.8, 'time_of_reading': '2023-05-03 01:54:04'} {'Status': 'Record Sucessfully Saved'} 2023-05-03 01:54:34.939224 34.8 {'data': 34.8, 'time_of_reading': '2023-05-03 01:54:34'} {'Status': 'Record Sucessfully Saved'}
```

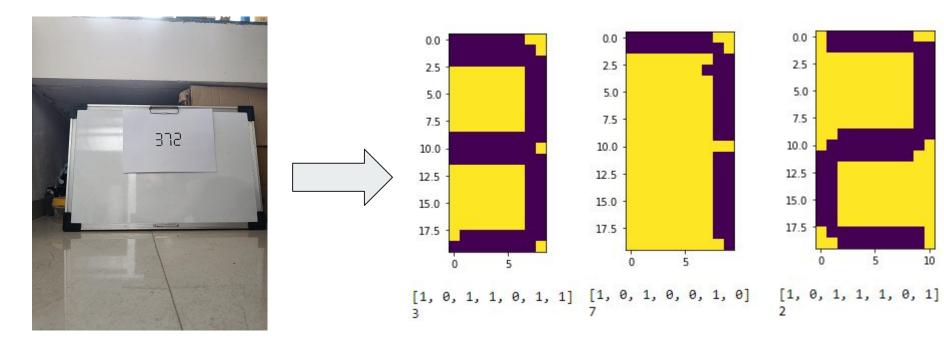

8. Backend implementation

- REST Django framework
 - o SQLite
 - Django Admin
 - FrontendCapabilities
- Alternate Option
 - Flask python
 - Laravel php

Demo 2 - Python Server + Django Server

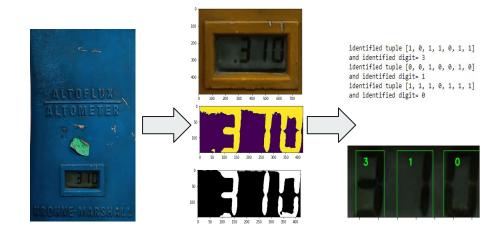

9. Demo - Dummy reading system

9. Demo - Video

10. Future Work

- Testing system with Lab instrument
- Testing for changes in obstruction, light change, change in orientation errors
- Can add graphical representation of data in Django framework, safety alerts through notifications
- Can test with arduino/raspberry pi to enhance the scalability of application

Codes

GitHub link.

https://github.com/DivyanshNatani/OCR-Display-Digitalisation

REST Django based Database application code can be accessed using this GitHub repository.

https://github.com/DivyanshNatani/OCR-Display-Database

Thank You!

Open for feedbacks and question...

Appendix

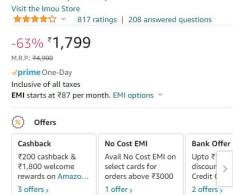

IP Camera

Things to look for

- Wifi camera link should be accessible with Python -
 - Most IP Camera are based on this feature only. Product does not explicitly mention the link on shopping website, but is available on setup manual.
 - o https://www.ispyconnect.com/cameras Can check company on this website
- Quality of Video
- Movement (if possible)
- Price vs Feature analysis

Imou WiFi Wireless Security Camera 256GB SD Card Support, 1080P Full HD, Audio Recording, Night Vision, Abnormal Sound Alarm, Alexa Google Assistant Compatible with Cameras (White)

Allows oversight of an entire room

Easy Installation

Mount it directly on metal surface with the magnetic bracket

1080P Full HD

Roll over image to zoom in

Manual Rotation

https://www.amazon.in/Imou-Security-Detection-Cue-2C/dp/B08HF1FJ6Q/

Super Wide 131° View Angle

The 108° diagonal field of view allows viewing of an entire room.

0-90° manual rotation allows you to view any place with your wish.

Attention: This is not a PT camera and will not rotate automatically. You have to adjust the angle manually.

Easy Installation

With the magnetic bracket, you can simply mount Cue 2C directly on metal surface.

Specifications

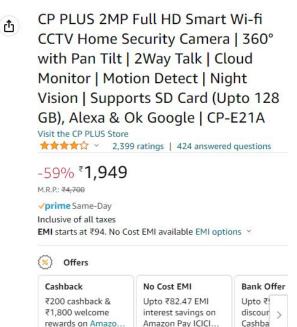

- Effective Pixels: 1920*1080
- . TF Card Support: Max. 64G
- · Motion Detection: Supported
- Video Frame Rate: 25FPS
- · Night Vision Distance: Up to 10M
- · Phone monitoring: IOS, Android
- · Detection and alarm: E-mail alerts, alarm client
- · Network protocol:TCP / IP, UDP, IMCP, SMTP, HTTP, FTP, DNS, DDNS DHCP, PPPoE, etc
- Wireless:Supports 802.11b / g / n wireless mode
- Indoor: Yes

Box:

- 1 * Conbre V380 Dual Antenna
- 1 * Adapter
- 1 * User manual
- 1 * Mount Stand
